PCT-USO1-01332-938

Sequence 938, Application PC/TUSO101332

Sequence 938, Application PC/TUSO101332

GENERAL INFORMATION:

APPLICANT: Human Genome Sciences, Inc., et al.

TITLE OF INVENTION: Nucleic Acids, Proteins, and Antibodies

FILE REFERENCE: PJZ02PCT

CURRENT APPLICATION NUMBER: PCT/US01/01332

CURRENT FILING DATE: 2001-05-09

PRIOR APPLICATION DATE: TOTOLOGY OF PALM OF file wrapper

NUMBER OF SEQ ID NOS: 1249

SEQ ID NO 938

LENGTH: 138

TYPE: PRT

TYPE: PRT
Search completed: September Job time: 488 sec
                                                                                                                                                                 Ş

        Pred. No. is the number of results predicted by chance to have a score greater than or equal to the score of the result being printed, and is derived by analysis of the total score distribution.
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                        DB seq length: 0
